

EASY Prompter™ software

*The solution to your
video prompting needs!™*

Now your students and announcers can use a full-featured professional prompting system at a fraction of the cost of other prompters. With Easy Prompter software, your scripts can be displayed on your computer screen at the touch of a button. Say good-bye to speaker notes! Improve camera/audience eye contact instantly! Place the computer screen near the camera lens and capture that professional look of network news anchors. Designed by educators for the school and small-format television studio, Easy Prompter software has the features you would expect from a broadcast studio's teleprompter.

- FULL TEXT EDITING** Easy Prompter software features a full text editor that makes typing and saving your scripts a snap.
- MULTIPLE READERS** Easy Prompter supports up to three readers using color-reversed and underlined text.
- SCROLL SPEED CONTROL** Scroll speed can be controlled by mouse, joystick, or keyboard. You can also set a default scroll speed to keep your readers on-pace.
- MIRROR-IMAGE OPTION** Easy Prompter will also display a mirror-image of your script on the computer screen, for those of you who want to experiment with true, through-the-glass teleprompting!

Afraid you won't have time to type in a new script each day? Simply save today's news show script using Easy Prompter. Tomorrow, load the script, make the necessary changes, and it's ready to use! Easy Prompter actually saves time by decreasing script mistakes. Readers will feel more relaxed knowing that reading the script and looking at the camera can actually be accomplished!

You can probably think of several other uses for Easy Prompter software: message boards, assignment reminders, school plays, and election speeches. Easy Prompter can become a valuable tool for your school or business.

SYSTEM REQUIREMENTS

- DOS 3.1 or better
- 640K RAM
- CGA, EGA, or VGA/SVGA monitor
- Mouse and/or joystick optional

Easy Prompter software has very low system requirements, allowing you to create your professional prompting system using a computer your school has marked "obsolete." Easy Prompter software will run on an older IBM compatible computer. (We've seen it used on a 286, which was manufactured around 1989.)

Yes, Easy Prompter will work with Windows (Windows 98 and later). Upon installation, an Easy Prompter icon will be placed on the desktop, and a listing under PROGRAMS of your START menu.
